Youhe Plastic Products Factory

Address: No. 307 Guanfu Road, Fuhai Town,

Cixi City, Zhejiang Province

Postal code: 315300

Four speed temperature regulation, four speed timing, waterproof surface, suitable for different types of pets. Amphibians, reptiles, cats and dogs, and other small animals can all be used

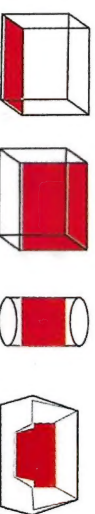

This product uses 5V power supply, which is very safe and has obtained various certifications. Please rest assured to use it.

Product parameters

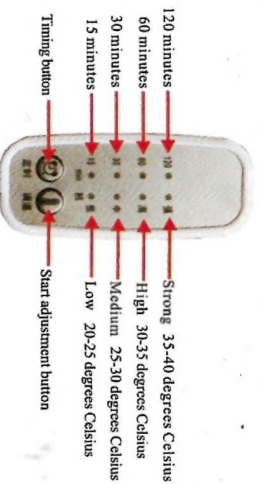

Size	Voltage * Current * Power
10x20cm	5v/2A/10W
15x30cm	5v/2A/10W
20x25cm	5v/2A/10W
25x30cm	5v/2A/10W
30x35cm	5v/2A/10W

usage method

5v2a power adapter, power bank, car USB, computer etc. can be used as long as the USB output power reaches 2A. A current below 2A will not heat up.

- 1: Place the heating pad under the breeding tank
- 2: Sticking to the side of the breeding box
- 3: Wrapped on the outer side of the cylinder
- 4: Put it directly in the pet nest or pet bed
- 5: It can be used on a sofa, bed, or carpet at home

Turn on the power, press the start button, select the appropriate gear, activate the timing button, select the timing time, and if timing is not required, do not activate the timing button.

The test data for this temperature was conducted in a laboratory at 15 degrees Celsius, which is the surface temperature of the mat.

WATT

- 1: The USB output power is below 2A and will not be heated.
- 2: When the ambient temperature is lower than 15 °C, please put a sponge pad or foam paper under the heating pad to save heat and avoid heat dissipation.
- 3: Please do not use a voltage exceeding 5V, otherwise there may be a risk of fire.
- 4: To avoid excessive temperature, do not fold it up for use
- 5: The surface of the heating pad is waterproof, but please do not put it directly in water as it will affect the heating effect

Specialty designed for small pets
making use more reassuring and convenient
